

Risk and Return Are Related

Three Dimensions of Stock Returns around the World

- **Equity Market**
(complete value-weighted universe of stocks)
Stocks tend to have higher expected returns than fixed income over time.
- **Company Size**
(measured by market capitalization)
Small company stocks tend to have higher expected returns than large company stocks over time.
- **Company Price**
(measured by ratio of company book value to market equity)
Lower-priced “value” stocks tend to have higher expected returns than higher-priced “growth” stocks over time.

Eugene F. Fama and Kenneth R. French, “The Cross-Section of Expected Stock Returns,” *Journal of Finance* 47, no. 2 (June 1992): 427-65.
